

Intra-Week ALERT for Wednesday – Jan. 10, 2018

“Monthly Cycles & Range Trading” [Excerpt]

STOCK INDICES, for the past 3+ years, have been closely adhering to a combination of monthly cycles with uncanny precision. This combination includes a 5-month cycle and its over-arching 10-month cycle.

As illustrated above, the 10-month cycle timed the Oct. 2014 low (following a sharp, Sept./Oct. sell-off), the Aug. 2015 low (following the Chinese equity crash - dropping over 40% in 2 - 3 months), the June 2016 low (following the 'surprise' Brexit vote that spurred a quick but temporary spike low) and the April 2017 low (following the first anticipated correction in 2017).

Those 4 successive lows usher in the time for an inversion of this cycle - following a 10-month *advance* rather than a 10-month *advance AND correction* - and a potential high in **Feb. 2018**.

The 5-month cycle corroborates that and projects a peak for **Feb.** (or **Jan.****) **2018**.

[**As noted in the accompanying 5-month cycle diagram, some indexes have led others - bottoming in the preceding month. That is why a pairing of months is shown in that diagram and why some indexes could peak in **Jan. 2018**.]

Monthly cycles are mainly used for developing general expectations, so it is necessary to hone that outlook and see what current market action is revealing. Daily & intra-month trends are key tools.

Both of those remain up and were expected to spur the Nasdaq higher into **[reserved for subscribers only]**...

In the interim, a short-term peak is possible but there is another ongoing factor that could spur some additional upside in the Nasdaq 100. That is the latest phase of an evolving progression of trading ranges - and multi-year tops & bottoms - that **[reserved for subscribers only]**.

BONDS & NOTES are fulfilling projections for a new sell-off that could also produce a multi-week low by **[reserved for subscribers only]**. Both have spiked down to weekly *HLS* levels (weekly extreme downside targets) - at **149-20/USH** & **122-24/TYH** - reinforcing that these declines are stretching to extreme levels.

The following are some of the additional factors that corroborated the outlook for another drop...

Looking out over the coming weeks, the weekly 21 *MARCs* are poised to steadily rise, exerting negative pressure on Bonds - and on the weekly 21 *MAC* - for several weeks to come.

Intra-Week ALERT for Wednesday – Jan. 10, 2018

“Monthly Cycles & Range Trading” [Excerpt]

All of that powerfully reinforces the significance of the early-Dec. (geometric & intermediate) cycle peak that was expected to trigger the next wave down. It has done that and projects a future (lower) high for **early-March 2018**...

GOLD & SILVER have surged and twice neutralized their respective weekly downtrends, after bottoming in the **first half of Dec.** and fulfilling multiple (yearly, monthly & weekly) cycle lows.

It would take weekly closes above **1327.3/GCG & 17.325/SIH** to reverse the weekly trends to up. Regardless of what occurs in the coming days, the overall outlook remains for an advance into **Feb. 2018**.

Gold powerfully validated that outlook by producing an outside-month *2 Close Reversal* higher in December, as Silver completed a corresponding monthly *2 Close Reversal* higher. Those signals project an ensuing 1 - 3 months of additional upside that should help support Gold prices into **February**.

Gold has the next phase of an ongoing 18 - 21 week cycle - that could produce a multi-week peak - coming into play between **mid-Jan. & early-Feb.**

A rally into **early-Feb.** - the final week of that cycle - would also complete a 29-week low-low-(high) *Cycle Progression* & a 14-week drop/7-week advance (50%) sequence, as well.

On an intermediate basis, Silver could also still set an important high in **Feb. 2018**. Since its bottom in Dec. '15, Silver has had 5 significant advances - each lasting ~2 months (Dec. '15 - Feb. '16, Mar. - May '16, May - Jly. '16, Dec. '16 - Feb. '17 & Jly. - Sept. '17). A similar, ~2-month advance would take Silver higher into **Feb. '18** - when other monthly cycles converge.

A peak in **Feb. 2018** would also complete successive ~7-month advances (Dec. '15 - July '16 & July '17 - **Feb. '18**) AND a ~9.5 month high (July '16) - high (mid-April '17) - high (**Feb. 2018**) *Cycle Progression*. A .618 rebound in time (12 months down/7 months up) would also peak in **Feb. '18**.

[It is also intriguing that Palladium has multi-year cycles projecting a peak for **1Q 2018** - most likely in **Feb. 2018**. Copper has cycles peaking in **Feb. 2018**.]...

In the short-term, Gold & Silver attacked 2 - 3 month resistance (**1315 - 1322.0/GCG & 17.45 - 17.60/SIH**) as they completed initial surges into early-Jan. That was expected to spur a reactive pullback, which is taking place.

Gold tested weekly support, its weekly *2nd Close Support* and its weekly *21 High MARC* support - all grouped at **1309.3 - 1311.5/GCG** - and is attempting to hold that near-term support.

The **XAU** has corrected after reversing its weekly trend up. This occurred right after it tested & held 2 - 3 month resistance at **88.00/XAU**.

As long as the XAU does not reverse its daily trend down, it should resume its advance in the second half of January.

Multiple monthly targets, extreme targets & key resistance projections group at **92.87 - 93.06/XAU** in **January** and could be tested before month-end.

Intermediate (2 - 4 week & 1 - 3 month) traders could have entered Gold stocks or related instruments before mid-Dec. and can **[reserved for subscribers only]...**

Intra-Week ALERT for Wednesday – Jan. 10, 2018

“Monthly Cycles & Range Trading” [Excerpt]

The preceding is an excerpt of the complete Jan. 10, 2018 *Weekly Re-Lay Alert* - provided to give a view of what was provided to subscribers in real time. However, any impending targets, cycles and developing trading strategies are reserved for subscribers only and omitted from this excerpt.
