

Intra-Week ALERT for Wednesday – March 14, 2018

**“Commodities Coalescing; Cryptos Correcting” [Excerpt]**

An intriguing interplay - between the Dollar, Gold & Silver, Stocks, Cryptocurrency and even Commodities - continues to evolve. As is the case with most inter-market correlations, there is very little *consistent* relationship.

That is because each market has its own governing fundamentals & cycles, revealed in their underlying technicals. When those markets are moving in a normal (non-extreme & not accelerated) fashion - as they do 80 - 90% of the time - they exert little correlated influence on the other markets.

It is only when one of those markets is in a parabolic phase, that the 'expected' relationships suddenly fall into line and trade in tandem... *for a brief period of time.*

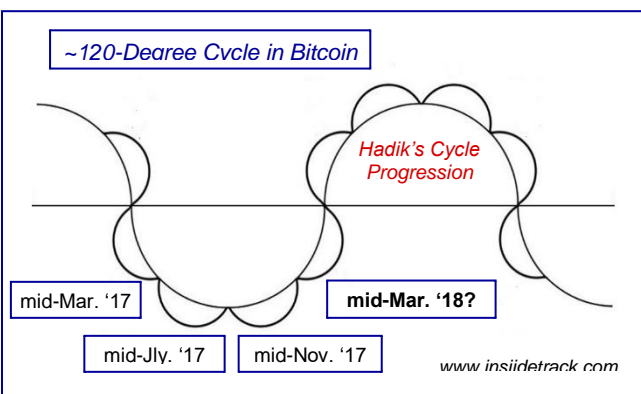

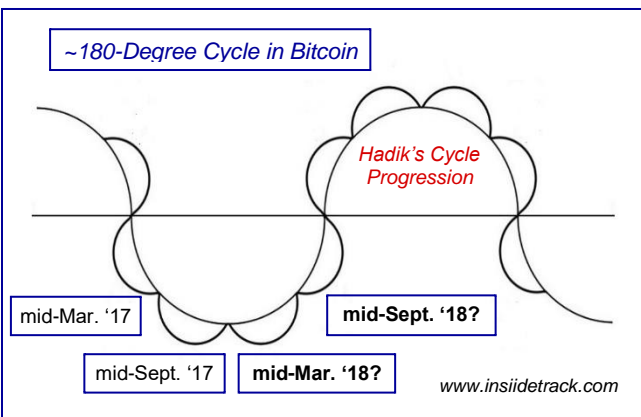

As soon as that *lead* market stops 'shouting', the *following* markets are quickly freed to 'listen' to their own, independent influences. (See *Hadik's Axiom of Market Correlation* - reprinted on page 4).

In Nov. & early-Dec., Bitcoin was in a parabolic advance - weighing on Gold & Silver (a competing 'anti-Dollar' currency alternative). In the second week of Dec., Gold, Silver & the XAU signaled a 1 - 2 month bottom and triggered 1 - 2 month buy signals - projecting accelerated advances into late-Jan.

A week later, Bitcoin peaked as it completed its 4<sup>th</sup> successive advance of 5 months duration.

Though the turning points were not in precise sync (they rarely are), the overall shift was undeniable and aligned perfectly with intermediate cycles, technical and trading signals. On a related basis, cryptocurrency are in another phase of their overall correction - declining as Gold is showing new signs of life.

Intra-Week ALERT for Wednesday – March 14, 2018

**“Commodities Coalescing; Cryptos Correcting” [Excerpt]**

The coming days, however, could be decisive as Bitcoin enters its next 1 - 2 month cycle low while completing a ~90-degree decline from the mid-Dec. peak (~.618 of the preceding 5-month advance). Monthly support comes into play around **7,150 - 7,480** and is the first pivotal level in the latest decline.

If Gold is going to **[reserved for subscribers only; see complete 3/14/18 Alert for details why the daily 21 MACs in the Dollar, Euro & Gold will likely shift on March 15 and usher in the completion of recent 3 - 5 day trends & signals.]**

All of these *perceived* correlations are expected to take on greater significance as the markets approach **May 2018** - a time of potential turmoil and the finale in several 3 - 6 month and/or 1 - 2 year trends. Taking a more specific look at individual markets...

**STOCK INDICES** are in the midst of a multi-month corrective phase, ushered in by the initial decline in late-Jan./early-Feb. In many stocks & indexes, that period witnessed initial 10 - 15% declines, leading into an intermediate low on Feb. 9.

At that time, the DJTA fulfilled downside objectives and perpetuated a ~12-week high-low-low-(low) *Cycle Progression* (that projects a future low in **May 2018**).

At the same time, the DJIA, S+P 500 & Nasdaq 100 were fulfilling 2 - 3 week sell signals and their weekly trend patterns. That weekly trend pattern projected a rebound and subsequent retest of the late-Jan. high, in at least one index. The NQ-100 has fulfilled that, with the Russell 2000 close behind.

Recent highs also fulfilled the daily trend patterns that projected a 1 - 2 week low on March 2 and a 3 - 5 day rally into **March 9/12** - the latest phase of a ~40-day

high (Nov. 9)--high (Dec. 19)--high (Jan. 29)--high (**March 9/12**) *Cycle Progression* in the DJIA. The daily 21 MACs reinforced the potential for a quick rally into **March 12**. Most equity indexes fulfilled those daily trend patterns and rallied into **March 12**.

At the same time, the daily trend pattern in the S+P (as well as the NYSE & MMX) deviated from the others and was projecting a rally to a secondary peak on **March 12**. It's daily trend pattern focused on **2795/ ESM** as the decisive level for an intermediate reversal signal and the onset of a new wave down.

Most of the indices fulfilled this potential, spiking to new rebound highs on **March 12** and immediately generating convincing daily reversal signals (many of them triggering outside-day/2 *Close Reversal* sell signals). They have since sold off but now approach a pivotal 1 - 2 day period.

At the very least, the S+P needs to **[reserved for subscribers only.]**

**GOLD & SILVER** now enter a pivotal 1 - 2 day period ...on **March 15** or **16**, it would usher in the potential for a drop back to **[reserved for subscribers only; see complete 3/14/18 Alert for explanation of key indicators that are, or could turn, negative as soon as March 15 - completing recent 3 - 5 day trends & triggering a pullback to critical levels.]**...

The **XAU** remains weak - and at risk of additional selling - until a daily close above **81.60**... it could spur another drop into **March 26 - 28**, the next phase of a 21 - 24 day/14 - 16 trading day low-low-high-high-high-(low) *Cycle Progression*.

(continued on page 3)

Intra-Week ALERT for Wednesday – March 14, 2018

**“Commodities Coalescing; Cryptos Correcting” [Excerpt]**

**SOYBEANS, CORN & WHEAT** fulfilled expectations for a 1 - 2 week correction into - and an intermediate low around - **March 12 - 16** - the latest phase of a ~60-degree low-low *Cycle Progression*. The daily trends have not turned down, projecting a likely rally back to recent highs.

**CRUDE OIL, UNLEADED GAS & HEATING OIL** are consolidating and could still see a rebound into - and set a secondary high on - **March 19 - 30**, the next phase of an 8 - 9 week high-high-high-high *Cycle Progression*.

**NATURAL GAS** remains likely to decline, on balance, into **April/May 2018**. It just neutralized its intra-month uptrend but needs a daily close below **2.642/NGJ** to turn that trend down.

**The preceding is an excerpt of the March 14, 2018 Weekly Re-Lay Alert - updating intermediate outlooks in many markets & explaining what could turn the Euro, Gold & Silver negative for a few**

**days... even as the Dollar bounces. All of this is likely as Bitcoin & Cryptocurrency enter a pivotal, intermediate cycle on March 15 - 22.**

**Out of loyalty to current subscribers, specific targets & trading strategies have been redacted.**

**Please refer to the complete March 14, 2018 Weekly Re-Lay Alert and to corresponding Weekly Re-Lay & INSIIDE Track publications for these and other specifics.**

**Hadik's Axiom of Market Correlation**

*“Markets only follow other markets when the lead market is going parabolic or is in an extreme phase. Also, correlations are only effective when you can be CERTAIN of the current focus of traders.”*
